

Byu wagons: Sound update

Typ	Sound update
Autor	Benjamin Ebrecht
Version	1.0
Datum	14.01.2013
Contact	ebrecht@trainteamberlin.de

1. Preamble

This is an update made for all users of the "Byu" wagon pack from the RW/0381 download shop (<http://www.rw-0381.de/>). It contains new configuration files which links the n-Wagon sound from the TrainTeamBerlin "BR143 PlusPack" to the Byu wagons. The door animation is adjusted as well.

It's possible to configurate the sound in the same way as in the BR143 PlusPack. But your configuration of the Byu wagon sound will be independent to the type-n-wagons. You can change between disk brakes and block brakes and furthermore you can (de)activate the door beep sound. Just open the file

```
..\railworks\Assets\DR\Byu\TTB_nWagSound\TTB_nWagWagonConfig.lua
```

with a text editor. Set the variable " TTB_nWag_Klotzbremse " to 0 to use disk brakes and set it to 1 if you want to use block brakes. Set the variable " TTB_nWag_DoorBeep" to 0 if you want to deactivate the door beep warning sound and set it to 1 if you want to activate it.

2. Installation

You **MUST** have installed the TrainTeamBerlin "BR143 PlusPack" if you want to use this update!

For installing this update, just copy the folder "Assets" of this archive into your Railworks (TS2013) main directory and let windows overwrite files when asked.

Please make a backup of the overwritten files on your own!
